Freedom
Bottom Timers

Freedom Bottom timers were specially developed in order to meet the needs of technical divers using ratio deco for decompression calculations. It features a clear and legible TFT display, which allows you to easily read all essential information in conditions of poor visibility or even without a mask. The operational depth for

this computer is 300m and its heavy-duty aluminum case was tested to 600m. The dive profile is visible in real time during your dive; it is recorded, can be seen in the device's logbook and can be downloaded onto a computer, mobile phone or tablet, using the included USB cable. This USB cable is also used for charging the battery.

Properties:

- Perfectly readable color TFT display
- Resistant aluminum body
- Highly accurate pressure sensor
- Easily operated buttons
- Rechargeable Li-Ion battery
- Precise mechanical design
- Electronics of industry quality with a long service life
- Surrounding light detection and automatically brightness adjustment of the display
- Gauge mode
- USB port for data transmission
- Display turning for the right or left hand
- Games
- Maximum depth 300 meters, tested up to 600
- Metric/imperial units
- Fabric strap or a bungee
- Connection to WETNOTES.COM

Freedom Advanced Bottom Timer

Freedom Advanced Bottom Timer is mainly for divers using ratio deco for decompression calculations. (#8102)

Freedom CCR Bottom Timer

The CCR bottom timer can be connected to a rebreather via the included O₂ sensor cable. One, two or three O₂ sensors can be connected. Each separate sensor value, as well as the average pO₂ value can be read on the primary screen. Furthermore, detailed information about each sensor, including sensor voltage, can be accessed on a separate screen. (#8103)

Freedom Bottom Timer packages includes:

- Freedom computer
- USB charger (#8075)
- Attachment bungee (#1481)
- Attachment strap (#1482)
- Attachment strap for dry suit (#1483)
- Silicon protective sleeve (#0832)
